

# The Scale and Rust Problem

Scale deposits on the inside of pipes, heating elements, household appliances and machinery create many problems, such as:

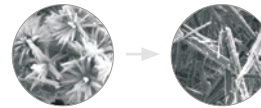

- ✗ Loss of water pressure due to a reduced pipe diameter
- ✗ Loss of energy in the hot water circuit
- ✗ Dull surfaces in kitchens and bathrooms
- ✗ High cleaning costs and the need for harmful cleaning agents
- ✗ Repeated repairs or replacement of household appliances or - in the worst case - replacement of the whole piping system
- ✗ High production costs
- ✗ Decrease in productivity

# The 3 Vulcan Effects

## 1. Vulcan reduces scaling on surfaces

Vulcan modifies the crystallization of the calcium. The scale loses its adhesive power and is washed away with the water as a fine powder.

## 2. Vulcan sanitizes the piping system

Vulcan carefully dissolves existing incrustations in the piping system. Only a thin protective layer remains in the pipe.

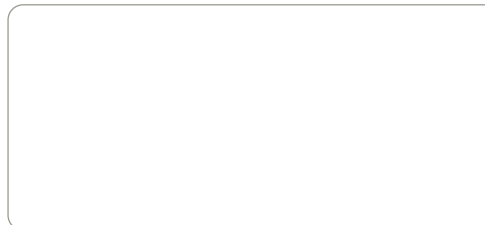

## 3. Vulcan protects against rust and corrosion

Vulcan generates a controlled electrophoresis process, which produces a protective metal-carbonate layer. It acts as protection against rust and corrosion.

# The Electronic Anti-Scale System

The **Green** Alternative To Water Softeners

# Vulcan Prevents Scale & Rust

# Benefits of Vulcan

# Vulcan Product Lines

## The eco-friendly electronic system

Get your **eco-friendly** solution to prevent scale and rust today. The **Vulcan-Impulse-Technology** treats water with electronic impulses and does not use any chemicals or salt. Scale is washed away with the water as a fine powder.

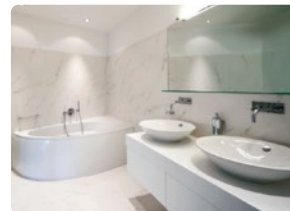

- Vulcan works on all pipe materials: iron, copper, steel, plastic, PVC, PE-X, compound pipes, etc.
- Easy Do-It-Yourself installation without cutting the pipes
- Vulcan works with special capacitive impulses and does *not* use magnetism
- Maintenance-free
- 25 years warranty

Long-life acrylic cast

Vulcan protects your whole piping system, appliances and equipment from aggressive scale deposits, unnecessary defects and corrosion.

- Secure reduction of scale deposits in the whole piping system
- Less time and effort spent on repairs and maintenance in your home, hotel or factory
- Filters, shower nozzles and shower heads stay clean longer
- Faster cleaning of kitchens and bathrooms
- Considerable savings in washing and cleaning agents
- Important and healthy minerals remain in the water
- Food and beverages keep their natural taste
- Skin feels softer and less dry
- Increase in productivity

## Residential - Commercial - Industrial

Vulcan S25

Model	Max. Pipe Diameter	Max. Capacity		Wattage
Vulcan 3000	1.5"	3000 l/h	13 gpm	2.0
Vulcan 5000	2"	8000 l/h	35 gpm	2.0
Vulcan S10	3"	15 m³/h	65 gpm	2.25
Vulcan S25	4"	30 m³/h	130 gpm	2.25
Vulcan S50	5"	70 m³/h	300 gpm	2.25
Vulcan S100	6"	120 m³/h	530 gpm	2.5
Vulcan S150	8"	180 m³/h	790 gpm	2.5
Vulcan S250	10"	350 m³/h	1540 gpm	2.75
Vulcan S350	14"	500 m³/h	2200 gpm	2.75
Vulcan S500	20"	800 m³/h	3520 gpm	3.25
Vulcan X-Pro 1	30"	unlimited		3.75
Vulcan X-Pro 2	40"	unlimited		3.75

The various product lines of Vulcan solve problems in residential use, commercial applications and in industrial settings.
